

A TABLE OF CONTENTS

Table of contents listing sections from A to T, including Machine and Manufacturer Identification, Machine Description, General Warnings, and Maintenance.

B MACHINE AND MANUFACTURER IDENTIFICATION

Identification labels for EX50 12V and EX75 12V pumps, including UL Listed logos, model numbers, and technical specifications.

AVAILABLE MODELS: EX50 - EX75 PIUSI S.p.A. Via Pacinotti 16/A - ZI. Rangavino 46029 Suzzara - Mantova (Italy)

C MACHINE DESCRIPTION

PUMP MOTOR SELF-PRIMING, VOLUMETRIC, ROTATING ELECTRIC VANE PUMP, EQUIPPED WITH BY-PASS VALVE.

C1 DEFINITION OF CLASS AND GROUPS

Table defining hazard classes (CLASS I, CLASS II, CLASS III) and groups (GROUP A, B, C, D) for flammable gases, vapors, and liquids.

Essential protective equipment characteristics: Prolonged contact with the treated product may cause skin irritation.

C2 INTENDED USE

THE DETERMINATION OF THE AREAS (ZONES) IS TO BE CARRIED OUT BY THE USER. Using the appliance for fluids other than those listed at paragraph "L4 - Fluids permitted" is forbidden.

C3 HANDLING AND TRANSPORT

Due to the limited weight and dimensions of the pumps, special lifting equipment is not required to handle them.

D GENERAL WARNINGS

Important precautions: To ensure operator safety and to protect the pump from potential damage, workers must be fully acquainted with this instruction manual before performing any operation.

E FIRST AID RULES

Contact with the product: In the event of problems developing following EYE/SKIN CONTACT, INHALATION or INGESTION of the treated product, please refer to the SAFETY DATA SHEET of the fluid handled.

F GENERAL SAFETY RULES

IT IS ESSENTIAL TO GET TO KNOW AND UNDERSTAND THE INFORMATION CONTAINED IN THIS MANUAL. IT IS ESSENTIAL TO GET TO KNOW AND OBSERVE THE SAFETY SPECIFICATIONS FOR FLAMMABLE LIQUIDS.

TO PREVENT ELECTRIC SHOCK AND DETONATION OF SPARKS, ALL PUMPING SYSTEM MUST HAVE PROPER GROUNDING, INCLUDING TANK AND ANY ACCESSORIES.

G TECHNICAL DATA

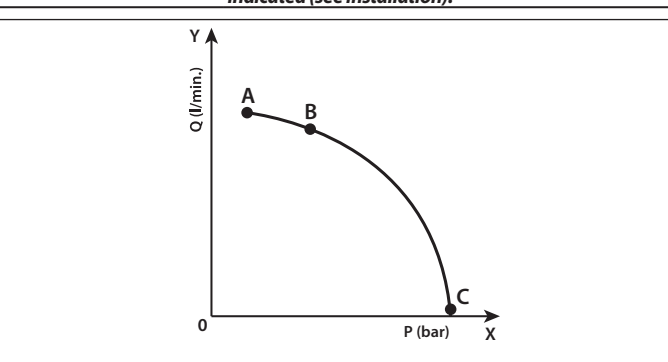

WARNING THE PUMP IS EQUIPPED WITH PROTECTION AGAINST OVERHEATING AND OVERLOAD RISKS. SHOULD SUCH CONDITIONS ACTIVATE, THE PUMP SHUTS DOWN AUTOMATICALLY.

G1 PERFORMANCE SPECIFICATIONS

Performance specifications table for EX50 15 GPM and EX50 17 GPM pumps, showing flow rate, back pressure, and delivery configuration.

WARNING

The curve refers to the following operating conditions: Fluid: PETROL. Temperature: 20°C. Suction conditions: The pipe and the pump position relative to the fluid level is such that a low pressure of 0.3 bar is generated at the nominal flow rate.

H ELECTRICAL DATA

Electrical data table showing pump model, power supply (Voltage, Frequency), and current (Max).

POWER CORD INPUT POWER CORD EX50 1/2" NPT Minimum section recommended for cables up to 6m: 2.5 MM² x 2 or 12 AWG.

POWER CORD EX75 1/2" NPT Minimum section recommended for cables up to 6m: 12 AWG. Recommended sheath: H07RN-F 790; SJT T90; AWM Syle 21179 T80.

I OPERATING CONDITIONS

11 ENVIRONMENTAL CONDITIONS AMBIENT TEMPERATURE min. +23 °F / max. +104 °F min. -10 °C / max. +40 °C

12 ELECTRICAL POWER SUPPLY

The pump must be powered by DC line, the nominal values of which are indicated on the table in the paragraph "I - ELECTRICAL DATA".

13 DUTY CYCLE

The pumps have been designed for intermittent use and a duty cycle of 30 min. ON and 30 min. OFF in conditions of maximum A. TEMPERATURE (40 °C) AND AT NOMINAL TRANSFER CONDITIONS.

L4 FLUIDS PERMITTED

WARNING THE PUMP CAN BE USED ONLY WITH THE FOLLOWING FLUIDS: - DIESEL - KEROSENE - PETROL. ALCOHOL MIXED MAX 15% - AVGAS 100/100LL (PUMP ONLY) - JET A / A1 (PUMP ONLY) - ASPEN2/4.

L INSTALLATION

WARNING BEFORE ANY OPERATION, ENSURE TO BE OUT OF POTENTIALLY EXPLOSIVE AREAS. The pump must never be operated before the delivery and suction lines have been connected.

WARNING IF VALVES IN THE CIRCUIT ARE TO BE INSTALLED, MAKE SURE THEY ARE EQUIPPED WITH OVERPRESSURE SYSTEM.

WARNING IF THE PUMP IS TO BE INSTALLED IN HAZARDOUS (CLASSIFIED) LOCATION, IT MUST BE INSTALLED BY A LICENSED ELECTRICIAN AND CONFORM TO NATIONAL FIRE PROTECTION ASSOCIATION (NFPA) CODES 30 AND 70 OR CSA 22.1.

L1 POSITIONING, CONFIGURATIONS AND ACCESSORIES

The pump must be secured in a stable manner.

WARNING It is the installer's responsibility to provide the line accessories necessary for the safe and proper functioning of the pump.

L2 NOTES ON SUCTION AND DELIVERY LINES

DELIVERY The selection of the pump model must be made taking into account the characteristics of the system.

N INITIAL START-UP

FOREWORD Check that the quantity of fluid in the suction tank is greater than the amount you wish to transfer.

NOTICE Fluid leaks can damage objects and injure persons.

WARNING Never start or stop the pump by connecting or cutting out the power supply.

NOTICE Prolonged contact with some fluids can damage the skin. The use of goggles and gloves is recommended.

O EVERY DAY USE

USE PROCEDURE 1 If flexible pipes are used, attach the ends of the piping to the tanks. In the absence of an appropriate slot, solidly grasp the delivery pipe before beginning dispensing.

WARNING THE WORKING OPERATIONS MUST ALWAYS BE GUARDED BY THE OPERATOR. The by-pass valve allows functioning with delivery closed only for short periods (max. 3 minutes).

WARNING BEFORE ANY OPERATION, ENSURE TO BE OUT OF POTENTIALLY EXPLOSIVE AREAS. IT IS THE INSTALLER'S RESPONSIBILITY TO CARRY OUT THE ELECTRICAL CONNECTIONS IN COMPLIANCE WITH THE RELEVANT STANDARDS.

M CONNECTIONS

M1 ELECTRICAL CONNECTIONS BEFORE ANY OPERATION, ENSURE TO BE OUT OF POTENTIALLY EXPLOSIVE AREAS.

WARNING All maintenance must be performed by qualified personnel. Tampering can lead to performance degradation, danger to persons and/or property and may result in the warranty and UL/ATEX CERTIFICATION being voided.

WARNING BEFORE ANY OPERATION, ENSURE TO BE OUT OF POTENTIALLY EXPLOSIVE AREAS FOR SAFETY REASONS IT'S NOT ALLOWED TO DISSEMBLE THESE PARTS: (1) BOTTOM (2) MOTOR PIPE (3) PUMP BODY.

WARNING All maintenance must be performed by qualified personnel. Tampering can lead to performance degradation, danger to persons and/or property and may result in the warranty and UL/ATEX CERTIFICATION being voided.

WARNING THE PUMP IS EQUIPPED WITH CURRENT-SENSING PROTECTION. IF IT ACTIVATES TURN OFF THE PUMP IMMEDIATELY.

NOTICE

IN THE EVENT OF INSTALLATION IN ZONES WHICH ARE NOT CLASSIFIED, IT IS SUFFICIENT TO OBSERVE THE MINIMUM SAFETY STANDARDS ALREADY MENTIONED IN THIS MANUAL.

WARNING The OWNER HAS THE RESPONSIBILITY TO VERIFY THAT ALL THE LOCAL AND NATIONAL REGULATIONS HAVE BEEN OBSERVED.

WARNING Make sure that the cable connecting the battery is protected from heat sources and sharp edges. Install the fuse closer to the battery.

M2 PIPING CONNECTIONS FOREWORD Before carrying out any connection, refer to the visual indications i.e. arrow on the pump head, to the centrifugal suction and delivery lines.

WARNING Wrong connection can cause serious pump damage.

PRELIMINARY INSPECTION Before connection, make sure that the piping and the suction tank are free of dirt and solid residue that could damage the pump and its accessories.

NOTICE Fluid leaks can damage objects and injure persons.

WARNING Never start or stop the pump by connecting or cutting out the power supply.

NOTICE Prolonged contact with some fluids can damage the skin. The use of goggles and gloves is recommended.

NOTICE Depending on the system characteristics, the priming phase can last from several seconds to a few minutes. If this phase is prolonged, stop the pump and verify:

INITIAL START-UP Check that the quantity of fluid in the suction tank is greater than the amount you wish to transfer.

NOTICE Fluid leaks can damage objects and injure persons.

WARNING BEFORE ANY OPERATION, ENSURE TO BE OUT OF POTENTIALLY EXPLOSIVE AREAS FOR SAFETY REASONS IT'S NOT ALLOWED TO DISSEMBLE THESE PARTS: (1) BOTTOM (2) MOTOR PIPE (3) PUMP BODY.

WARNING All maintenance must be performed by qualified personnel. Tampering can lead to performance degradation, danger to persons and/or property and may result in the warranty and UL/ATEX CERTIFICATION being voided.

WARNING THE PUMP IS EQUIPPED WITH CURRENT-SENSING PROTECTION. IF IT ACTIVATES TURN OFF THE PUMP IMMEDIATELY.

Q NOISE LEVEL

Under normal operating conditions, noise emission of all models does not exceed 74 dB at a distance of 1 metre from the electric pump.

R PROBLEMS AND SOLUTIONS

For any problems contact the authorised dealer nearest to you.

Table of problems and solutions, including issues like 'THE MOTOR IS NOT TURNING', 'THE MOTOR TURNS SLOWLY WHEN STARTING', and 'LOW OR NO FLOW RATE'.

S DEMOLITION AND DISPOSAL

Foreword If the system needs to be disposed, the parts which make it up must be delivered to companies that specialize in the recycling and disposal of industrial waste and, in particular:

Disposing of packing materials Metal parts, whether painted or not, are made of steel, can be consigned to scrap metal collectors.

Disposal of electronic components Suction circuit blocked Remove the blockage from the suction circuit.

Disposing of RAEE equipment as household wastes is strictly forbidden. Such wastes must be disposed of separately.

Any hazardous substances in the electrical and electronic appliances and/or the misuse of such appliances can have potentially serious consequences for the environment and human health.

In case of the unlawful disposal of said wastes, fines will be applicable as defined by the laws in force.

Other components, such as pipes, rubber gaskets, plastic parts and wires, must be disposed of by companies specializing in the disposal of industrial waste.

Disposing of RAEE equipment as household wastes is strictly forbidden. Such wastes must be disposed of separately.

Any hazardous substances in the electrical and electronic appliances and/or the misuse of such appliances can have potentially serious consequences for the environment and human health.

In case of the unlawful disposal of said wastes, fines will be applicable as defined by the laws in force.

Other components, such as pipes, rubber gaskets, plastic parts and wires, must be disposed of by companies specializing in the disposal of industrial waste.

T EXPLODED VIEWS

WARNING THE WORKING OPERATIONS MUST ALWAYS BE GUARDED BY THE OPERATOR. The by-pass valve allows functioning with delivery closed only for short periods (max. 3 minutes).
