

# AdBlue Manual Rotary IBC Pump

RHP380

## AdBlue Hand Pump Kit for 1000L IBC's

The RHP380 is a fully rotary hand transfer pump suitable for installation on to the top outlet CDS connection featured on AIR1 AdBlue IBC's.

Re-engineered for the onset of Euro 6 vehicles, the RHP380 pump embraces the design concept of the popular RHP105 and enhances it further with numerous design improvements.

Delivering increased performance and a greatly improved service life, the RHP380 IBC hand pump is suitable for customers using up to 8000L/year.

### Specification

<b>Pump</b>	Fully Rotary Hand Pump
Mechanism	Rotary Vane
Materials	In accordance with ISO 22241-3
Fittings	SEC Coupler to connect to IBC
Delivery	Up to 38 litre/min
Suction Lift	1.2m when primed

<b>Filling Nozzle</b>	Rigid Spout with 360° swivel
Spout	16mm Ø x 77mm length
Fitting	¾" BSPP
<b>Dispensing Hose</b>	PVC 19mm ID
Length	2.5m

Our hand pump kit includes everything needed to enable dispensing of AdBlue from the IBC both quickly and efficiently.

Suitable for light and occasional use, the RHP380 is designed for applications transferring up to 8000L/yr. It is also ideal to keep on site as an emergency backup solution for high usage sites to minimise downtime during routine maintenance.

Designed to transfer AdBlue into the vehicles holding tank at speeds of up to 38 litre/min

The pump is secured to the top of the IBC directly on to the industry standard CDS/SEC suction coupler.

The equipment is weatherproof and suitable for permanent outdoor use.
